

RONILSYNGHAL

∃ synghalronil@gmail.com

www.ronilsynghal.com

Concord, CA | Philadelphia, PA

Budding full stack engineer with experience at a large-scale healthcare company and early-stage startup. Passionate about designing and creating meaningful products that provide a great experience to users.

EDUCATION

University of Pennsylvania

• **MSE** in **Robotics** | GPA: (3.97/4.00)

Jan 2021 - May 2022

● **BSE** in **Bioengineering** | GPA: (3.70/4.00)

Aug 2018 - May 2022

<u>Relevant Coursework:</u> Brain Computer Interface, Intro to Machine Learning, Bioinformatics, Biological Data Science, Rehab Engineering & Design

Activities: Engineering Deans' Advisory Board,
Penn Masti (Bollywood/Fusion Dance Team),
Varsity Tutors

SKILLS

Proficient
 Python (Dash, Pandas, NumPy, Flask), SQL,

Intermediate
Javascript, React.js, Onshape, Git, C, Figma, InVision

HTML/CSS, MATLAB, R, SolidWorks, InVision

Intermediate
 Flutter, Python (TensorFlow), Swift, Protopie

EXPERIENCE

Full Stack Engineer

Early Stage Stealth Startup | May 2021 - Present

- Lead full-stack development & UI/UX for various projects for upcoming healthcare software design & consulting firm
- Designed end-to-end application for data-driven psychological assessment of employee motivation using SQLite for databases, Python frameworks for API Design & NLP, & Plotly Dash/CSS for user experience
- Developed early warning system for nephrology practice **leveraging ML techniques** against 7 components of medical history to **automate risk-stratification for 3000 patients** to reduce hospitalizations

Machine Learning Research Intern

Radhakrishnan Lab | Jan 2021 - Present

- Worked under Dr. Ravi Radhakrishnan to build quantitative models of signaling networks relevant to profiling & predictive modeling of clinical cancer mutations in many transformed cell lines
- Used biophysical/biochemical research to understand activation of kinase mutations in the EGFR domain to improve
 parameters for a neural net tool which predicts mutation effects & allows personalized cancer treatment

Engineering and Business Analyst Intern

Kaiser Permanente | Jun 2019 - Dec 2019

- Prototyped remote tracking of all hospital assets & 100+ employees using RF-enabled ID badges, & created a heat map
 in JavaScript to track the IOT devices
- Designed & developed the user experience for the patient-facing nutrition tracking app using Flutter

SELECT PROJECTS

Employee Motivation Assessment

 Developed the NLP algorithm for a web application that automates scoring for the Thematic Apperception Test & designed the UI using Plotly Dash/CSS for Dr. Brad Spencer

Bluetooth Enabled ECG Device for Astronauts

• Designed an electronic circuit for Bluetooth-enabled portable cardiac monitoring after filtering ECG data & developing algorithms for waveform analysis & biomarker detection of respiratory/heart rates

Fall Detection System for Children's Hospital of Philadelphia

 Surveyed 50+ staff/patients & analyzed real-time data on patient falls to diagram common fall locations, redesign non-slip socks, & prototype a fall detection device using Solidworks & Arduino
